

13th February 2017

Our Ref: 557474

Dear Sir / Madam,

Ref: Safety Communication about our Holybourne Site.

We wrote to you back in November 2016 advising you, as one of our neighbours, of a change in the Control of Major Accident Hazards Regulation 2015 (COMAH) which applies to our Holybourne Terminal and Oil Storage facility.

We have been working closely with the Health & Safety Executive (HSE) and Environment Agency (EA) to ensure that our policies and procedures meet the standards required by the COMAH regulations. As we continue with this process we will keep you informed of any updates and changes.

Ensuring the safety of our operations is our number one priority and we take all reasonable steps to prevent accidents of any type. Should an incident occur we have detailed emergency plans in place to minimise the effects. If necessary, the company's resources would be reinforced by the emergency services and special provisions made by Hampshire County Council.

It is worth reiterating that there have been no changes to the function of the site, nor will there be, as a result of the COMAH regulation change. Our operations will continue and there will be no change to the safety of the site. As before, we shall continue to review and enhance our safety and emergency arrangements.

The principle purpose of the statement update is to describe the nature of our operations at Holybourne and to provide you with information on the procedures that would take place, including how you would be contacted, in the highly unlikely event of a major incident.

As part of our ongoing improvements to the Holybourne Off-Site Emergency Plan, we will be carrying out a review and update to the plan held by Hampshire County Council (HCC), during this year. As part of that process HCC would like to ensure your contact details are available to them and/or are correct. This is to allow the Police Force Control Room to alert you in the event of an emergency and advise you on any precautionary measures as outlined in the information document.

Your contact details will be included in subsequent police action plans, and will only be used to contact you in the event of an Off-Site Emergency at the Holybourne site. They will be stored securely and will not be publically available.
